CONTENTS

Preface ix

Rapid heating in fragile molecule mass spectrometry
R.J. Beuhler and L. Friedman (Upton, NY, U.S.A.) 1

A model of ion evaporation tested through field desorption experiments on glucose mixed with alkali metal salts
S.C. Davis, V. Natoli, G.M. Neumann and P.J. Derrick (Kensington, N.S.W., Australia) 17

Mechanism of cationization of sucrose by sodium in laser desorption: a study by Fourier transform mass spectrometry
M.P. Chiarelli and M.L. Gross (Lincoln, NE, U.S.A.) 37

Matrix-assisted ultraviolet laser desorption of non-volatile compounds
M. Karas, D. Bachmann, U. Bahr and F. Hillenkamp (Münster, F.R.G.) 53

Biomolecules in the gas phase. III. Multiphoton ionization mass spectra of phenylthiohydantoin amino acids and free amino acids
J. Grotemeyer, K. Walter, U. Boesl and E.W. Schlag (Garching, F.R.G.) 69

Particle bombardment (keV) mass spectra of ethylene glycol, glycerol, and water at sub-ambient temperatures
R.N. Katz, T. Chaudhary and F.H. Field (New York, NY, U.S.A.) 85

Understanding the glycerol surface as it relates to the secondary ion mass spectrometry experiment. A review
W.V. Ligon, Jr. and S.B. Dorn (Schenectady, NY, U.S.A.) 99

Characterization of organic dyes aided by hydrogen–deuterium exchange in liquid secondary ion mass spectrometry (liquid SIMS)
B.L. Bentz and P.J. Gale (Princeton, NJ, U.S.A.) 115

Interfacial reactions and counterion effects in the secondary ion mass spectra of perrhenate salts
O.W. Hand, S.M. Scheifers and R.G. Cooks (West Lafayette, IN, U.S.A.) 131

Some general aspects of the chemistry of organo-alkali metal ions. An overview of recent work
L.M. Mallis and D.H. Russell (College Station, TX, U.S.A.) 147

Metastable ion studies with a secondary ion time-of-flight mass spectrometer. Enhanced distinction between isomers of *O*-alkylated thymidines
F. LaFortune, W. Ens, F.E. Hruska, K.L. Sadana, K.G. Standing and J.B. Westmore (Winnipeg, Man., Canada) 179

Ion/molecule reactions of sputtered species
J.E. Campana (Las Vegas, NV, U.S.A.), M.M. Ross and J.H. Callahan (Washington, DC, U.S.A.) 195

A comparison of keV atom bombardment mass spectra of peptides obtained with a two-sector mass spectrometer with those from a four-sector tandem mass spectrometer
S.A. Martin and K. Biemann (Cambridge, MA, U.S.A.) 213

The influence of sample preparation on molecular ion formation in plasma desorption mass spectrometry of peptides and proteins
P. Roepstorff, P.F. Nielsen (Odense, Denmark), B.U.R. Sundqvist, P. Håkansson and G. Jonsson (Uppsala, Sweden) 229

A study of the fragmentation of singly and multiply charge ions produced by ^{252}Cf fission fragment bombardment of polypeptides bound to nitrocellulose
B.T. Chait (New York, NY, U.S.A.) 237

High mass fragmentation. Matrix effects in plasma desorption mass spectrometry
P. Demirev, C. Fenselau and R.J. Cotter (Baltimore, MD, U.S.A.) 251

Desorption of secondary ions from Langmuir–Blodgett films following bombardment with fast heavy ions
G. Säve, P. Håkansson, B.U.R. Sundqvist, E. Söderström, S.-E. Lindquist (Uppsala, Sweden) and J. Berg (Stockholm, Sweden) 259

The charge state dependence of desorption. A way to study the energy transfer to the surface
K. Wien, O. Becker, W. Guthier (Darmstadt, F.R.G.), S. Della-Negra, Y. Le Beyec, B. Monart, K.G. Standing, G. Maynard and C. Deutsch (Orsay, France) 273

^{252}Cf plasma desorption Fourier transform mass spectrometry of involatile compounds
J.A. Loo, E.R. Williams, J.J.P. Furlong, B.H. Wang, F.W. McLafferty (Ithaca, NY, U.S.A.), B.T. Chait and F.H. Field (New York, NY, U.S.A.) 305
A mechanism of ion production in secondary ion mass spectrometry
D.A. Kidwell, M.M. Ross and R.J. Colton (Washington, DC, U.S.A.) 315
Collision cascade parameters for slow particles impinging on biomolecule targets
H.J. Whitlow (Stockholm, Sweden), M. Hautala (Helsinki, Finland) and B.U.R. Sundqvist (Uppsala, Sweden) 329
Mechanisms of ion-induced desorption of large molecules and clusters
B.V. King (Newcastle, N.S.W., Australia), I.S.T. Tsong and S.H. Lin (Tempe, AZ, U.S.A.) . . . 341
Mechanisms for the desorption of large organic molecules
R.E. Johnson (Charlottesville, VA, U.S.A.) 357
